PROJECT TITLE:

ONLINE EXAM SYSTEMS

ABSTRACT:

Online Exam System is a web application that helps the faculties to conduct the online quizs forstudents. In our college also conduct quiz in online mode. In this lockdown, many colleges planned to conduct the final exam through online. In this web application users create own account to login and attend the exams. If any student like any college, they can use our website

PROBLEM STATEMENT:

This pendemic situation somethings is not possible for us like schools and collages are reopen.This situation everything is happened through online. We are stay at home still 6 months. If it goes like this everyone will suffer. So every collages are decided to conduct classes and exams through online. Our project also like this to help to conduct online exams.

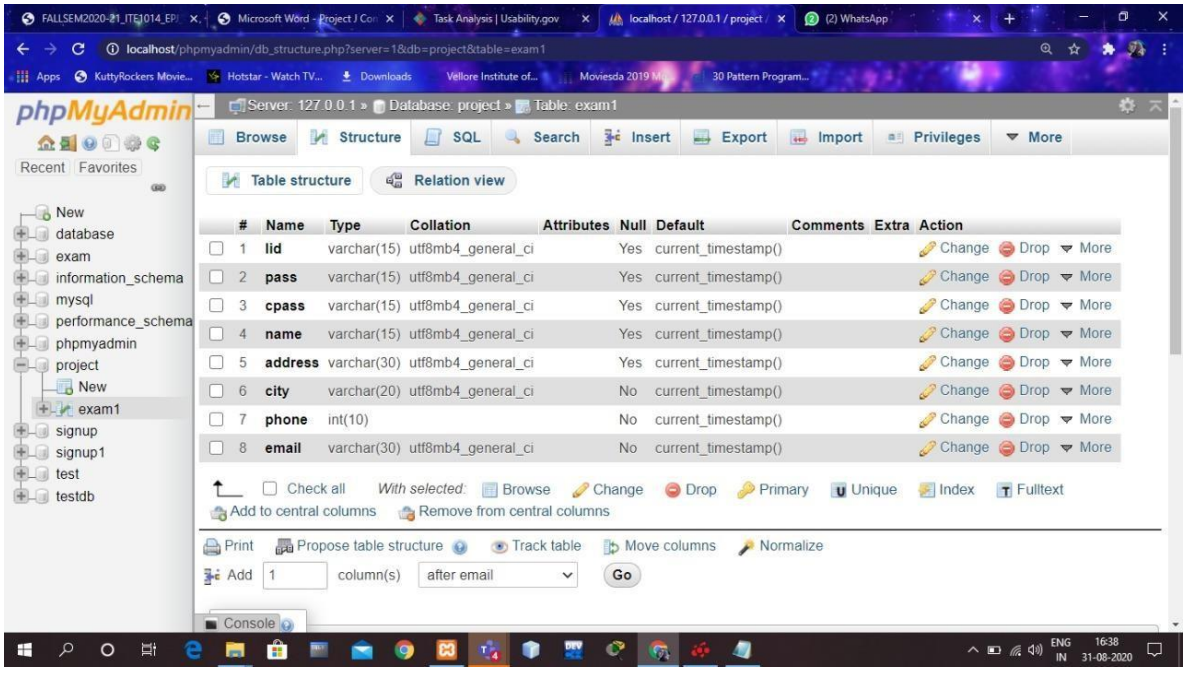
DATABASE DETAILS:



MODULES:

SIGNUP MODULE:

In this module user can signup to the website by entering user name, password,mail id,name. After signup the system links to Profile page.

Login Module: In this module user can login to the website by entering Email ID and password. After Login the system links to Profile page.

Admin Module: In this module user can login to the website by entering login ID and password. After Login the system links to Profile page. User can create and delete quiz.

Subject Module: In this module user can write exam by entering access code.

Feedback Module: In this module user can send feedback to admin

Contact Module: In this module user can contact us.

CONCLUSION:

We have to use this website to conduct quiz for students during pendemic situation. Its helpful for

Students and also teachers.
